Email: laura.duchnak@navy.mil

**POTENTIAL CONFLICT OF INTEREST BY CONTRACTOR EMPLOYEES AT THE
DEPARTMENT OF THE NAVY'S FORMER HUNTERS POINT NAVAL
SHIPYARD SITE**

Dear Ms. Duchnak:

The California Department of Toxic Substances Control (DTSC) and California Department of Public Health (CDPH) are concerned about potential conflicts of interest for contractor employees working for the Department of the Navy's (Navy) federal contractor, Battelle Memorial Institute (Battelle), which is providing quality control and third-party oversight of the resampling effort and other work related to the Hunters Point Naval Shipyard (Hunters Point) site. Because the resampling work for Parcel G is expected to start soon, DTSC and CDPH urge the Navy to take immediate action to address the potential conflicts of interest described in this letter to ensure the integrity of the resampling and oversight process and to ensure that similar potential conflicts do not occur in the future. These steps are important to restore public confidence in the cleanup of the Hunters Point site.

As you know, the Navy is resampling areas at the Hunters Point site in response to the falsification of radiological sampling data by Tetra Tech EC, Inc. (Tetra Tech EC) employees. It is our understanding that Battelle has hired and is using or planning to use two former Tetra Tech EC employees to help provide quality control oversight for the resampling work and other work related to the Hunters Point site. We understand Tetra Tech EC previously employed these two individuals and that they may have worked at the Hunters Point site during the time that other Tetra Tech EC employees falsified data relating to the site.

Ms. Laura Duchnak
Page Two
December 18, 2018

Additionally, Greenaction for Health & Environmental Justice (Greenaction) has submitted a petition to the Nuclear Regulatory Commission to revoke Tetra Tech EC's radiological materials license based on Tetra Tech EC's work at the Hunters Point site.¹ Greenaction's petition contains three declarations from individuals who voice concerns about work that one of Battelle's current employees performed when employed by Tetra Tech EC.

As the lead agency responsible for the cleanup of the Hunters Point site, the Navy must ensure the integrity of the cleanup, independence of its sampling, and strict oversight of its contractors. This means avoiding all potential conflicts of interest, whether actual or perceived, related to the cleanup of the Hunters Point site. Anything less has the potential to erode public confidence in the resampling effort and any potential cleanup. We urge the Navy to take immediate action prior to the start of resampling of Parcel G to help restore confidence in the integrity of the resampling and any potential cleanup at the Hunters Point site.

Sincerely,

Barbara A. Lee
Director
California Department of Toxic
Substances Control

Pelosi Statement on Securing \$60 Million for Hunters Point

Washington, D.C. – Democratic Leader Nancy Pelosi issued this statement after securing \$60.4 million for Hunters Point re-testing and clean-up in the FY2019 Energy and Water, Legislative Branch, and Military Construction and Veterans Affairs minibus spending bill:

“At this critical point for the Hunters Point clean-up, I am proud to have fought in the Congress to secure an additional \$60.4 million in federal funding above the President’s budget for excavation, resampling and rescanning of the base – on top of the \$36 million in base clean-up funding I secured for the Shipyard in the 2018 omnibus funding bill. These funds will ensure that every area touched by Tetra Tech EC will be retested, and the health and safety of the Bayview-Hunters Point Community will be protected.

“Bayview-Hunters Point residents deserve our relentless commitment to an open, transparent clean-up that holds Tetra Tech EC accountable for its outrageous data manipulation and falsification. We must ensure that this breach of the public trust can never again happen, and provide proper oversight to ensure that the Navy fulfills its responsibility to thoroughly clean up the Shipyard.

“In my time representing San Francisco in the U.S. Congress, it has been my honor to have secured over \$1 billion for the clean-up of the Hunters Point Shipyard. Our community deserves to know that these investments are being made in a safe, smart and transparent manner, and to have all the resources and information they need to guarantee the health and safety of themselves and their families.”

Navy to host bus tours of Navy cleanup sites on September 8, 2018

Click here to register for the September 8th HPNS Bus Tours

Derek Robinson, BRAC Environmental Coordinator for HPNS, will be hosting guided bus tours of the cleanup sites at HPNS on **Saturday, September 8, 2018**. The first tour begins at **9:00 a.m.**

This popular tour provides community members an opportunity to learn more about the history and status of the cleanup sites at the former shipyard. The tours are intended to provide cleanup program information and updates to members of the community and the general public.

Registration is now open for the first tour at 9:00 a.m.; seats on the second tour will open after the first bus is filled. Sign up now to reserve your seat!

**Register for the September
HPNS Bus Tours**

PUBLIC COMMENT PERIODS FOR NAVY DOCUMENTS

Comments to Navy documents must be submitted in writing during the official Public Comment Period for each respective document to:

Additional information on *Document Review Locations* and *How to Comment on a Navy Document* are available in the **DOCUMENT RESOURCES** section of this edition of *Around the Shipyard*.

Five-Year Review Available for Public Review and Comment Through September 7, 2018

The Navy follows federal guidelines during the cleanup at HPNS established in The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (also known as Superfund), as amended by The Superfund Amendments and Reauthorization Act (SARA) of 1986. In accordance with federal requirements, the Navy conducts reviews of remedies at HPNS every five years.

This is the fourth Five-Year Review of remedies at HPNS, providing an update of the status of remedial actions at HPNS and progress made since the third Five-Year Review in November 2013.

Comments on this document must be submitted to Derek Robinson (as noted above) by September 7, 2018.

[Click here for a direct link to the Draft Fourth Five-Year Review.](#)

Small, illegible text or a very small logo located below the 'x' icon.

Dr. Kathryn Higley,
Community Technical
Advisor for
Radiological Health
and Safety

Technical Advisor Available to Answer Radiological Health and Safety Questions

As the Navy's community technical advisor for HPNS, Dr. Higley is available to help answer your radiological health and safety questions. She may be reached by phone at (541) 737-7063 or by email at Kathryn.Higley@oregonstate.edu. Please contact her if you would like to schedule a time to meet in person.

About Dr. Higley

Dr. Higley is the Head of the School of Nuclear Science and Engineering at Oregon State University. As a Certified Health Physicist, she holds degrees in Radiological Health Sciences and is an internationally-recognized expert in radiological health and safety. She is a highly qualified independent resource available to the public to assist with HPNS radiological issues.

Navy Community Liaison Available for Information

On behalf of the Navy, Mr. James Bryant is available as a resource to the Hunters Point Community during the radiological retesting at HPNS. You may drop in to Mr. Bryant's office anytime during regular office hours to pick up information, ask questions, or leave comments on the Navy's cleanup at HPNS.

Mr. Bryant's office is located at JBR Partners, 1333 Evans Avenue, San Francisco 94124. To schedule a time to meet with Mr. Bryant, please call him at (415) 970-9051. He is also available by email at community@sfhpn.com

*Please note: Official public comments should not be delivered to Mr. Bryant's office. Please reference information below for instructions on **How to Comment on a Navy Document**.*

About Mr. Bryant

Mr. Bryant is a local Bayview resident with a long history in community outreach. He serves as a resource to the HPNS community on behalf of the Navy by gathering community member questions and sharing information on the Navy's radiological cleanup at HPNS. Mr. Bryant welcomes you to strike up a conversation when you see him out and about in the Bayview. In addition, he welcomes your comments and questions at when he attends various local community group meetings and events.

Science, Technical, & Government Document Room, 5th Floor

100 Larkin Street
San Francisco, CA 94102
(415) 557-4400

Shipyard Site Trailer

690 Hudson Avenue
San Francisco, CA 94124
(near the HPNS main gate)

Navy's Website

Radiological retesting documents are available on the new **REFERENCE LIBRARY** page of the Navy's website. Additional program documents may be found on the **DOCUMENTS** page of the Navy's website.

How to Comment on a Navy Document

The Navy encourages members of the public to review and comment on documents related to the cleanup at HPNS. Federal law requires an official Public Comment Period for specific documents. In addition, the Navy may release additional documents for public comment to encourage public participation in the cleanup process and to gain feedback on the work planned.

Listed below are a few suggestions about how you can get involved with the Navy's cleanup at HPNS. *In advance, thank you for your input!*

1. Access and read the document(s) available for public comment

Go the Navy's website or visit one of the local **Information Repositories** (see *Document Review Locations, above*) to review the documents included in a current official Public Comment Period.

2. Clarify your concerns

Work plans and findings reports are technical in nature. If you have questions or need clarification, contact Navy team members and other experts to help you understand whether your concerns are addressed in the document.

3. Document your comments

Write down your comments. Be as specific as possible, noting the section and page number your comment applies to.

4. Be constructive

When possible, offer feedback that may be used to improve the program. Comments that are specific, measurable, attainable, and relevant are best.

5. Be timely

To be sure that your comments are included in the official record, make sure you submit your comments before the official Public

Comment Period for the document you are interested in closes.

All comments on Navy HPNS documents must be submitted in writing to:

Derek Robinson

BRAC Environmental Coordinator, HPNS
Navy BRAC PMO West
33000 Nixie Way
Bldg 50, 2nd Floor
San Diego, CA. 92147

Comments may also be submitted by email to: derek.j.robinson1@navy.mil

Upcoming Navy Meetings and Presentations

HPNS Events Calendar At a Glance (January - March 2018)

SAVE THE DATE: Navy Community Meeting Open House

Wednesday, January 31st

Join the Navy at the OCII Community Room at 451 Galvez Avenue (next to the Storehouse) on Wednesday, **January 31st from 5:30-7:30 pm** for an update on the Navy's ongoing radiological data evaluation.

Informational posters and a video presentation will be available during the event. Navy program representatives, regulatory agency members, and independent experts will be available to answer questions.

You are welcome to show up any time during the open house to learn more about the ongoing radiological data evaluation and ask questions.

Community Conversations

*Dr. Kathryn Higley,
Community Technical Advisor
for Radiological Health and
Safety*

Ask an Expert - January 31st

Dr. Kathryn Higley will be in the Bayview Hunters Point community in late January. Please look for her at one of the locations as per the schedule below:

January 31, 2018 from 10:00 am - 12:00 noon

The Storehouse, 451 Galvez Avenue

January 31, 2018 from 5:30 pm - 7:30 pm

(during the Navy Community Meeting Open house)

OCII Community Room, 451 Galvez Avenue

About Dr. Higley

Dr. Higley is the Head of the School of Nuclear Science and Engineering at Oregon State University. As a Certified Health Physicist, she holds degrees in Radiological Health Sciences and is an internationally-recognized expert in radiological health and safety. She is a highly qualified independent resource available to the public on HPNS radiological issues.

As the Navy's community technical advisor for HPNS, Dr. Higley welcomes **community conversations** with you to help answer your radiological health and safety questions. She is available by phone at (541) 737-7063 or by email at Kathryn.Higley@oregonstate.edu. In addition, you may contact her if you would like to schedule a time to meet in person.

*James Bryant, Navy Community
Liaison for Radiological
Program Outreach*

Link with Your Liaison at the Navy's January Meeting or During Monthly Office Hours

Mr. Bryant encourages you to attend the Navy's January 31st Community Meeting Open House! He will be available

throughout the event to connect you with Navy representatives who can answer your questions, share information, and discuss your thoughts and concerns.

Mr. James Bryant is available in his office to talk with you about the Navy's cleanup at HPNS on the **first Tuesday of every month from 2:00 p.m. to 4:00 p.m.** at his office: JBR Partners, 1333 Evans Avenue, San Francisco 94124. You may drop in anytime during the liaison office hours to pick up information, ask questions or leave comments on the Navy's cleanup at HPNS. **Stop by to say hello, share your thoughts, and pick up some information on the Navy's cleanup at HPNS!**

About Mr. Bryant

Mr. Bryant is a local Bayview resident with a long history in community outreach. He serves as a resource to the HPNS community on behalf of the Navy by gathering community member questions and sharing information on the Navy's radiological cleanup at HPNS. Mr. Bryant welcomes you to strike up a conversation when you see him out and about in the Bayview. In addition, he welcomes your comments and questions at a local community group meetings and events that he attends.

If you are unable to visit with him during his scheduled monthly **community conversations**, you may pick up printed materials at his office or call him at (415) 970-9051 to schedule a time to meet. He is also available by email at community@sfnps.com

Radiological Program Update

Radiological data evaluation information

Come to the Navy's HPNS Community Meeting Open House on January 31, 2018 from 5:30 pm - 7:30 pm at the OCII Community Room, 451 Galvez Avenue to learn about the Navy's progress with the ongoing radiological data evaluation at HPNS. Navy and regulatory agency members will be available to answer project-related questions. In addition, independent experts will be at the event to answer more detailed questions in their areas of expertise:

Dr. Kathryn Higley from Oregon State University, an expert in radiological health and safety and a resource for the Bayview Hunters Point community as a technical advisor

Ms. Sarah Roberts from Oak Ridge Associated Universities, an expert in independent verification activities and point of contact for the HPNS radiological data evaluation

Tamsen Drew from the City of San Francisco's Office of Community Investment and Infrastructure, a project manager for the City and County of San Francisco with detailed knowledge of the redevelopment plans for HPNS

Navy documents and presentation materials describing the ongoing radiological data evaluation at HPNS may be found on the Radiological Cleanup Pages of the Navy's website at www.bracpmo.navy.mil/hpnsrc. To receive a copy of fact sheets by email, please send a request to info@sfhpn.com or leave a message on the HPNS Info Line at (415) 295-4742. Other documents and program information may be found using the resources described in **Other Information** at the end of this newsletter.

Subject: Hello Mayor-Elect Breed: Urgent request for meeting about Shipyard Superfund Site issues

Hello Mayor-Elect Breed,

Congratulations on your election.

I am writing to request 15 minutes of your time next week to discuss the urgent and recent developments at the Hunters Point Shipyard Superfund Site.

We want to bring to your attention community concerns regarding the "retesting" plan and other cleanup issues. This is one of the most important issues you will have to deal with as Mayor.

Joining me at the meeting would be Michelle Pierce of Bayview Hunters Point Community Advocates, and Leaotis Martin of the Bayview Hunters Point Mothers and Fathers Committee.

We look forward to your prompt response and scheduling of a meeting due to the absolute urgency of this matter.

Thank you,

Bradley Angel, Executive Director

Subject: Breaking news.... Greenaction Files Petition to Revoke Tetra Tech's California License, and NRC agrees to consider Petition to revoke national license

Tetra Tech is working in communities across the state and nation despite their massive fraud at the Hunters Point Shipyard Superfund Site in San Francisco.
We are turning up the heat on this company and the government agencies that looked the other way for years as the fraud took place.

Greenaction for Health and Environmental Justice

Environmental Law & Justice Clinic at Golden Gate University School of Law

For Immediate Release July 26, 2018

Contact:

Steven Castleman, Environmental Law and Justice Clinic/Golden Gate University School of Law (415) 442-6675; cell: (415) 846-4608

Bradley Angel, Greenaction for Health and Environmental Justice (415) 722-5270

David Anton, Attorney (530) 759-8421; cell: (530) 220-4435

As NRC Agrees to Hear Greenaction's Petition to Revoke

Tetra Tech's License due to Hunters Point Shipyard Fraud,

Greenaction Files New Petition with California Department of Public Health

to Revoke Tetra Tech's California Radiological Material License

San Francisco, CA – Greenaction for Health and Environmental Justice today filed an administrative petition with the Radiological Branch of the California Department of Public Health to revoke Tetra Tech EC, Inc.'s California Radiological Material License No. 7909-01. The well-documented petition sets forth in detail why license revocation is warranted; because Tetra Tech committed massive radiological fraud in the remediation of the decommissioned Hunters Point Naval Shipyard in San Francisco, California, a federal Superfund site.

Greenaction's Petition to CDPH and all supporting documents can be found at:
https://www.dropbox.com/sh/zh2pknpgvuucjp0/AAA-1xjCHxjVtQ_s8wvTpm9Za?dl=0

In a victory for Greenaction and the public interest, on July 2, 2018, the Nuclear Regulatory Commission informed Greenaction's attorneys that it will hear Greenaction's petition to revoke Tetra Tech's national license. The petition was filed on June 29, 2017, over a year ago. The new petition filed today with the State of California contains extensive new factual documentation learned and acquired in the 13 months since the original petition was filed with the NRC.

The Superfund Site is located in the heart of the Bayview Hunters Point neighborhood along San Francisco Bay, and is heavily contaminated with radioactive and hazardous wastes. Thousands of homes are planned to be built at the site, and thousands of long-time residents live adjacent to the Shipyard.

Tetra Tech was responsible for radiological remediation at the Shipyard Superfund Site. Rather than conducting a proper cleanup, however, Tetra Tech: faked potentially thousands of soil samples, substituting known "clean" samples to prove remediation had been completed when it had not; discarded "dirty" samples; altered data to avoid further cleanup; used potentially contaminated soil as backfill on the Shipyard; permitted potentially contaminated soil to be shipped offsite to locations not permitted for radiological waste; and falsified building surveys to make them appear clean,

USEPA, US Navy and the state Department of Toxic Substances Control allowed Tetra Tech to keep working at the site, until public pressure forced EPA and DTSC to write to the Navy on September 13, 2016 to put a hold on any further transfers of parcels of Shipyard land to the City due to Tetra Tech's apparent massive fraud. Since that time, federal and state agencies have reviewed much of Tetra Tech's work at the Shipyard and have concluded that its data has no integrity. Environmental and criminal investigations of Tetra Tech's work continue.

Despite clear and massive fraud at the Shipyard, including the fact that two Tetra Tech supervisors are now in federal prison for committing fraud, Tetra Tech continues to work on government contracts across the Bay Area, state and nation – including at Treasure Island in San Francisco Bay.

"The more we learn, the clearer it is Tetra Tech can't be trusted to do radiation work and its federal and state licenses should be revoked," said Steve Castleman, Attorney with the Environmental Law and Justice Clinic of the Golden Gate University School of Law. "We're pleased we'll be able to make that case directly to an NRC hearing board and hope the Department of Public Health grants us the same opportunity in the near future."

"Whistleblower claims and government investigations show Tetra Tech engaged in decade long radioactive frauds putting health and lives at risk for centuries," said Attorney David Anton. "Tetra Tech no longer deserves the privileges of the licenses issued by the Nuclear Regulatory Commission and California."

"Our government must protect people and the environment by ensuring that Tetra Tech never again gets to commit fraud that endangers people's health and environment," said Bradley Angel, Executive Director of Greenaction for Health and Environmental Justice. "It is time for justice, and for proper cleanups of the Shipyard and other contamination sites far and wide."

Sausalito, California 94965

Contact: Charles Bonner, Esq.
415-331-3070
Charles@bonnerlaw.com

WHAT: Press Conference. A delegation of Hunters Point women, Plaintiffs in the \$27 Billion Hunters Point Community Lawsuit brought by the Law Offices of Bonner & Bonner against the Tetra Tech company on May 1, 2018, for its fraudulent activities in lying about cleaning up the radiated land at the Hunters Point Shipyard, further exposing the community to poisonous, cancer-causing toxins, will confront and demand meetings with newly-elected San Francisco Mayor London Breed and Board President Malia Cohen, who represents Hunters Point. These residents charge Cohen with complete dereliction of duty, not only for refusing to meet with her constituents, or for doing anything at all to seriously test and clean up the Shipyard but also for leading the way in expanding the Shipyard development plans of the Lennar company at the Board's April 26, 2018, meeting. Mayor Breed, also, has refused to meet these residents, focused more on the offensiveness to tourists of feces on the street than on the lives of the people of Hunters Point.

WHEN: Thursday, July 26, 2018, 10:00 a.m.

WHERE: Steps of City Hall, San Francisco, CA

WHO: **Former Black Panther Party leader Elaine Brown** is heading the delegation that includes **Danielle Carpenter**, lead Plaintiff in the Lawsuit and widow of Chris Carpenter, who died from cancer several years ago on account of his employment at the Shipyard. As residents have been denied appointments, the Delegation will visit Breed's and Cohen's offices to demand to see them or get appointments. They are demanding that 1) the City pay for real testing of all of the Shipyard soil by certified environmental scientists approved by the community; 2) the City pay for testing of all Hunters Point residents for cancer and other diseases known to be caused by radiation, under procedures and with doctors approved by the community; and 3) that the City halt all development at the Shipyard until all the soil has been certified remediated.

Dear San Francisco Board of Supervisors,

Please see the attached letter from Greenaction for Health and Environmental Justice, Bayview Hunters Point Community Advocates, and the Bayview Hunters Point Mothers and Fathers Committee, regarding the need for comprehensive retesting and cleanup of the entire original Shipyard site and adjacent areas, including parcels already transferred to the City and to Lennar/Five Points.

Please also join us Wednesday night at 6 pm at the Huntersview Phase 1 Community Room to hear community members discuss the retesting, cleanup and related issues.

Thanks for reading this important letter,

June 11, 2018

San Francisco Board of Supervisors
1 Dr. Carlton B. Goodlett Place, #244
San Francisco, CA 94102

Dear San Francisco Board of Supervisors,

On behalf of our many members and constituents in Bayview Hunters Point, we thank you for holding a hearing in response to Tetra Tech's fraud at the Hunters Point Naval Shipyard Superfund site. During the hearing, the Board of Supervisors sent a loud and clear message to the Navy, its contractors, state and federal regulatory agencies, and the San Francisco Department of Public Health. Now it is imperative that we do everything in our collective power to ensure the Hunters Point Superfund site remediation is comprehensive, transparent, and trustworthy. In addition to the Tetra Tech issue, there are other major problems with the Superfund remediation plan that also pose a serious threat to public health and the environment.

However, we are extremely disappointed and concerned that since that hearing, Mayor Farrell and SFDPH official Amy Brownell made public statements promoting the alleged safety of the shipyard despite knowing that retesting needs to be done due to the massive fraud. Without comprehensive retesting and a proper cleanup, it is irresponsible and reckless for our elected officials and agencies to assert that this radioactive and toxic contaminated site is safe. Mayor Farrell and SFDPH seem more interested in promoting Lennar/Five Points' giant upscale gentrification project (falsely promoted as much needed housing for San Francisco residents) instead of protecting our health and environment.

To achieve the goal of a comprehensive cleanup that protects the health and environment of our community, we call on our city agencies and leaders to support the following community demands.

1. Full retesting of the entire Shipyard and adjacent areas, including parcels already transferred. – not just scanning

Retesting must include the entire original shipyard site/footprint, parcels that have already been transferred, and adjacent areas such as Mariner's Village. Tetra Tech worked in many areas of the Shipyard, including Parcel A. Recent information indicates that massive fraud may have occurred on other parcels already transferred to the city as well. Merely scanning a few parcels is not acceptable.

2. Testing methodology

- a. Radiological core sampling must be conducted of the entire site and adjacent areas. It is imperative that all core samples go at least 9 feet beneath the surface.
- b. The core sampling should create a 2m x 2m mapping grid
- c. All core sampling must follow split sampling protocols.
- d. All ground water should be tested for radiation contamination, including aquifers A and B
- e. Immediately begin working with the State of California and the Bay Area Air Quality Management District to develop and implement standards for fugitive radiological dust

7. City must comply with its Precautionary Principle Ordinance

In July 2003, the San Francisco Board of Supervisors adopted the Precautionary Principle Ordinance which became Chapter 1 of the San Francisco Environment Code. The ordinance states in part: "Where threats of serious or irreversible damage to people or nature exist, lack of full scientific certainty about cause and effect shall not be viewed as sufficient reason for the City to postpone cost effective measures to prevent the degradation of the environment or protect the health of its citizens.....There is a duty to take anticipatory action to prevent harm."

The City's bias and support for Lennar gentrification project, instead of calling for comprehensive retesting and comprehensive cleanup of radioactive and toxic waste at and near the shipyard, violates the Precautionary Principle, civil rights, and environmental justice.

We therefore respectfully request – and demand – that our city support the steps identified above.

We also request your presence at the Bayview Hunters Point Emergency Community Meeting to be held on Wednesday, June 13th at 6 pm at the Huntersview Phase 1 Community Room. This will be an important opportunity for you to learn, listen and respond to community concerns.

Sincerely,

Bradley Angel, Executive Director, Greenaction for Health and Environmental Justice

Michelle Pierce, Executive Director, Bayview Hunters Point Community Advocates

Mavis Williams and Leaotis Martin, Co-Directors, Bayview Hunters Point Mothers & Fathers Committee for Health and Environmental Justice

Subject: \$27 BILLION HUNTERS POINT LAWSUIT AGAINST TETRA TECH

Dear London,

Fully aware that you are involved in a significant election tomorrow, I write from the urgency of the situation in Hunters Point--an area of interest to you no matter the outcome of the election. Given the public "hearing" you co-hosted, as such, some weeks ago, regarding the radiation of the land at the Shipyard and the fraudulent tests conducted by Tetra Tech, primary defendant in the lawsuit, it seems you are aware of the life-and-death dangers the people of Hunters Point are facing and have faced for decades, in terms of fear of contracting and actually contracting cancers and other life-threatening illnesses arising from exposure to radiation at the Shipyard.--It is my understanding this might include your nephew, a former student at Muhammad's University school, whose mother was a Tetra Tech employee, the school's students and personnel being plaintiffs, along with the hundreds and hundreds of others already identified since the lawsuit was filed on May 1.

As part of the core team organizing around the lawsuit, I'm asking to meet with you, one-on-one, re the lawsuit.

With the hope that once the election is over tomorrow, you will find the time to set up such a meeting, I can be reached on my cell: 404-542-1211.

Looking forward to hearing back from you, I send you my best.

Elaine Brown

Subject: Tetra Tech stands by its work at Hunters Point: Why the Claims from a Disgraced Attorney and "Whistleblowers" are False

Importance: High

An important insight from Tetra Tech EC that clears the air on why the charges that are being made by a disgraced attorney and his "whistleblower" clients are false about Tetra Tech's work at Hunters Point Shipyard. See Today's San Francisco Chronicle opinion piece from Tetra Tech.

Regards, Sam Singer

Tetra Tech stands by its work at Hunters Point

By Preston Hopson

May 17, 2018

San Francisco and the Bayview-Hunters Point community deserve to know that Tetra Tech EC's work — assessing and remediating about 20 percent of the Hunters Point Shipyard — was done properly.

Tetra Tech stands by the validity of our work. We believe all concerns can be addressed by our offer to pay for independent testing, which will demonstrate our portions of the shipyard were remediated to the standards established by the U.S. Navy.

Here are six facts about our work at Hunters Point:

- 1** Our remediation was done properly.
- 2** This is true despite two rogue employees, who illegally swapped soil, and a subcontractor with New World Technology, who participated in the crime in 2012.
- 3** These illegal actions were detected by the Navy in 2012.

4 Once detected, Tetra Tech immediately reviewed 100 percent of its work, re-sampled and remediated areas at our own cost.

5 Tetra Tech's remediation was then approved in an independent review by the Navy in 2014.

6 The whistle-blower claims are false.

Tetra Tech's primary work, which was the assessment and remediation of low-level radiation, began in 2002. A number of other contractors worked at Hunters Point and also provided remediation services, both radiation and chemical.

Tetra Tech was directed by the Navy to use New World Environmental Inc., doing business as New World Technology, as the "singularly qualified" firm. Our radiological work occurred under the direct supervision and control of New World Technology from 2003 through March 2009 because New World Technology held the license from the Nuclear Regulatory Commission. Tetra Tech implemented its own NRC license in 2009.

In 2012, the Navy alerted Tetra Tech that some soil samples did not appear consistent to other samples. We determined, with Navy oversight, that 33 areas needed resampling, and of those resampled areas, one-third needed additional remediation, which was completed in early 2013.

We issued an initial report in November 2012 and, after a thorough Navy review, the final public report in April 2014. At that time, we could not figure out why there was a breach of protocol in 2012 that caused these soil samples to not be reflective of the area's soil makeup.

In 2014 the Navy also completed an independent review of our work and found that "The Navy's contractor corrected identified deficient conditions and incorporated additional QC (quality control) steps to avoid recurrence." The report was presented to the U.S. Environmental Protection Agency, the state Department of Toxic Substances Control, and the state Department of Public Health. Despite investigations by us, the Navy and the Nuclear Regulatory Commission, we didn't know what went wrong.

Now, we know Stephen Rolfe and Justin Hubbard, and New World Technology employee Anthony Smith, were part of a cabal that falsified data.

Smith said in court he falsified data and swapped soil samples — unethical and illegal actions — at the shipyard, where he worked as a radiation control technician with Rolfe and Hubbard. We don't understand why he wasn't charged by the U.S. Justice Department.

We are fully supportive of the actions taken by the Justice Department against Rolfe and Hubbard for falsifying reports. We vehemently reject their activities and have zero tolerance for violations of established protocols and procedures.

The Justice Department also interviewed Tetra Tech EC's most senior managers overseeing these men and no charges were brought against them, as they had no role and no knowledge of the wrongdoing.

All the allegations being made today originate from the 2012 soil sample anomalies. In 2014, Smith labeled himself a whistle-blower and began making the false allegations that are being promoted and causing concern today.

It should be noted that Smith is represented by attorney David Anton, who has been twice suspended by the California State Bar for fabricating evidence and conflict of interest. We think these facts should make the public look carefully at the claims these men are making, which are only intended to scare the community and enrich themselves through resulting lawsuits.

Lastly, Tetra Tech is a California firm, based in Pasadena. It has 17,000 employees, many in the San Francisco area. After more than 50 years in business, we provide engineering and technical services, including environmental remediation, on more than 60,000 projects worldwide each year. We would never condone the wrongdoing that was done by these three individuals.

We know the work we did at Hunters Point Shipyard is right — and we know that an independent review that we have offered to pay for will set the record straight. We encourage the Navy to accept our offer and begin work immediately.

Preston Hopson is senior vice president and general counsel for Tetra Tech Inc., the parent company of Tetra Tech EC, a provider of consulting, engineering, remediation and construction services worldwide.

The Hunters Point Naval Shipyard in the city's southeast corner was the site of nuclear weapons research causing widespread radiological contamination. Navy ships contaminated by hydrogen bomb tests in the Pacific were taken to Hunters Point for decontamination, which left the shipyard heavily polluted with radioactivity. It has been an EPA Superfund site since 1989. In today's real estate-mad San Francisco, it is slated for the largest redevelopment since the 1906 earthquake.

Beginning in 2010, employees of the Navy's site consultant, Tetra Tech, reported extensive data manipulation, falsification, and other efforts to minimize evidence of soil contamination. In the fall of 2017, internal Navy analyses of these measurements concluded that nearly half of the sampling was suspect.

The EPA performed its own review, which found data falsification and quality deficiencies were far wider and deeper than the Navy had admitted. On two major parcels covering 40% of the site, EPA found 90% of samples were suspect on one and 97% were suspect on the other. The Navy, by contrast, recommended resampling in only 15% of the samples from the first parcel and 49% of the second. In its December 27, 2017 comments on the Navy's submission, John Chesnutt, an EPA Superfund Manager, wrote:

"The data revealed not only potential purposeful falsification and fraud in terms of sample and/or data manipulation, they also reveal the potential failure to conduct adequate scans, a lack of proper chain of custody for ensuring samples were not tampered with, extensive data quality issues (including off-site laboratory data) and general mis-management of the entire characterization and cleanup project."

"Hunters Point is unfolding into the biggest case of eco-fraud in U.S. history," stated PEER Executive Director Jeff Ruch, who obtained the EPA review under the Freedom of Information Act. "What makes these findings so remarkable is that the Navy was on notice for years that it had a major data meltdown on its hands yet is still trying to cook the books."

This spreading data manipulation scandal obscures the true level of contamination remaining at the site. As many as a dozen years of sampling may be worthless. EPA is still reviewing the testing at other parcels covering 60% of the site, so there may be more shoes to drop. Further, there is growing concern that the standard used by the Navy for what is "clean" has also been manipulated to significantly downplay dangers.

"The Navy created an environmental nightmare on this stretch of the San Francisco Bay but instead of cleaning it up has spent the past several years compounding it," added Ruch, noting that EPA Administrator Scott Pruitt claims that reforming Superfund is a top priority. "Besides being a poster child for reform of the Superfund program, this case cries out for accountability from the Navy, its contractor, and the EPA."

Subject: [Non-DoD Source] Request for Briefing on Hunters Point Shipyard Cleanup (8/13/18 at 2:00pm in SF)

All,

Mayor London Breed has asked for an in-person briefing on work related to the ongoing cleanup in the Hunters Point Shipyard. The briefing will take place on Monday, August 13th, from 2:00pm - 3:00pm, at City Hall in San Francisco. We ask that you be prepared to provide an update on your work in this area, discuss steps that have been taken to date, and objectives in both the short and long term moving forward.

Please RSVP as soon as possible as to whether you will be able to attend or not.

Date: Monday, August 13th, 2018

Time: 2:00pm - 3:00pm

Location: City Hall, Room 201

Address: 1 Dr. Carlton B. Goodlett Pl., San Francisco, CA 94102

Best,

Eddie

Edward McCaffrey
Manager, State and Federal Affairs
Office of Mayor London N. Breed
City and County of San Francisco

HUNTERS POINT RADIOLOGICAL REEVALUATION

History

- **Evolution of issue** (Navy found irregular soil data; Tetra Tech reported scanning issues; Navy found additional issues; Former Tetra Tech employee claims)
- **In 2016 Navy suspended property transfer and initiated an extensive data analysis**
- **In Nov 2017 Navy concluded and EPA reinforced that the Tetra Tech data was not reliable for making decisions**
- **Parcel A was previously delisted and transferred in 2004**

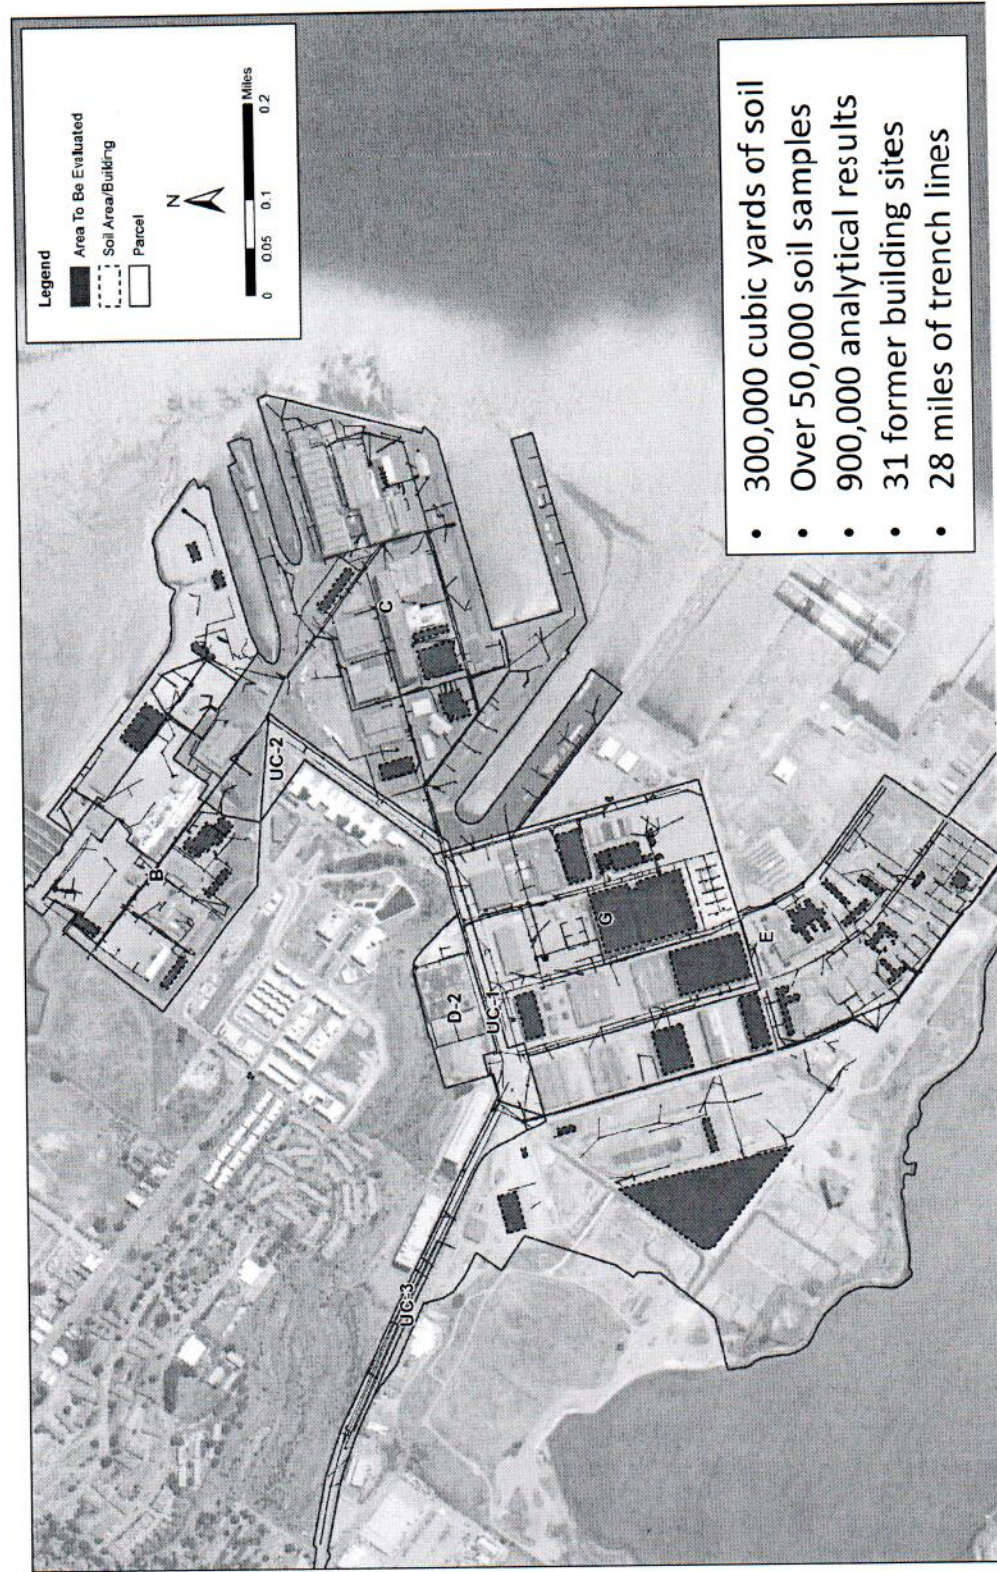

Plan Forward

- **Support Parcel A evaluation**
- **Parcel G work plan released for regulatory and public review on June 15th, comment period concludes on August 14th**
- **Address comments and issue Draft Final work plan**
- **Contract actions underway to facilitate implementation, anticipate being in the field before the end of the year**
- **Navy hired independent 3rd party oversight**
- **Once progress is made on Parcel G, can proceed with other parcels (UC-1, UC-2, D-2 next)**

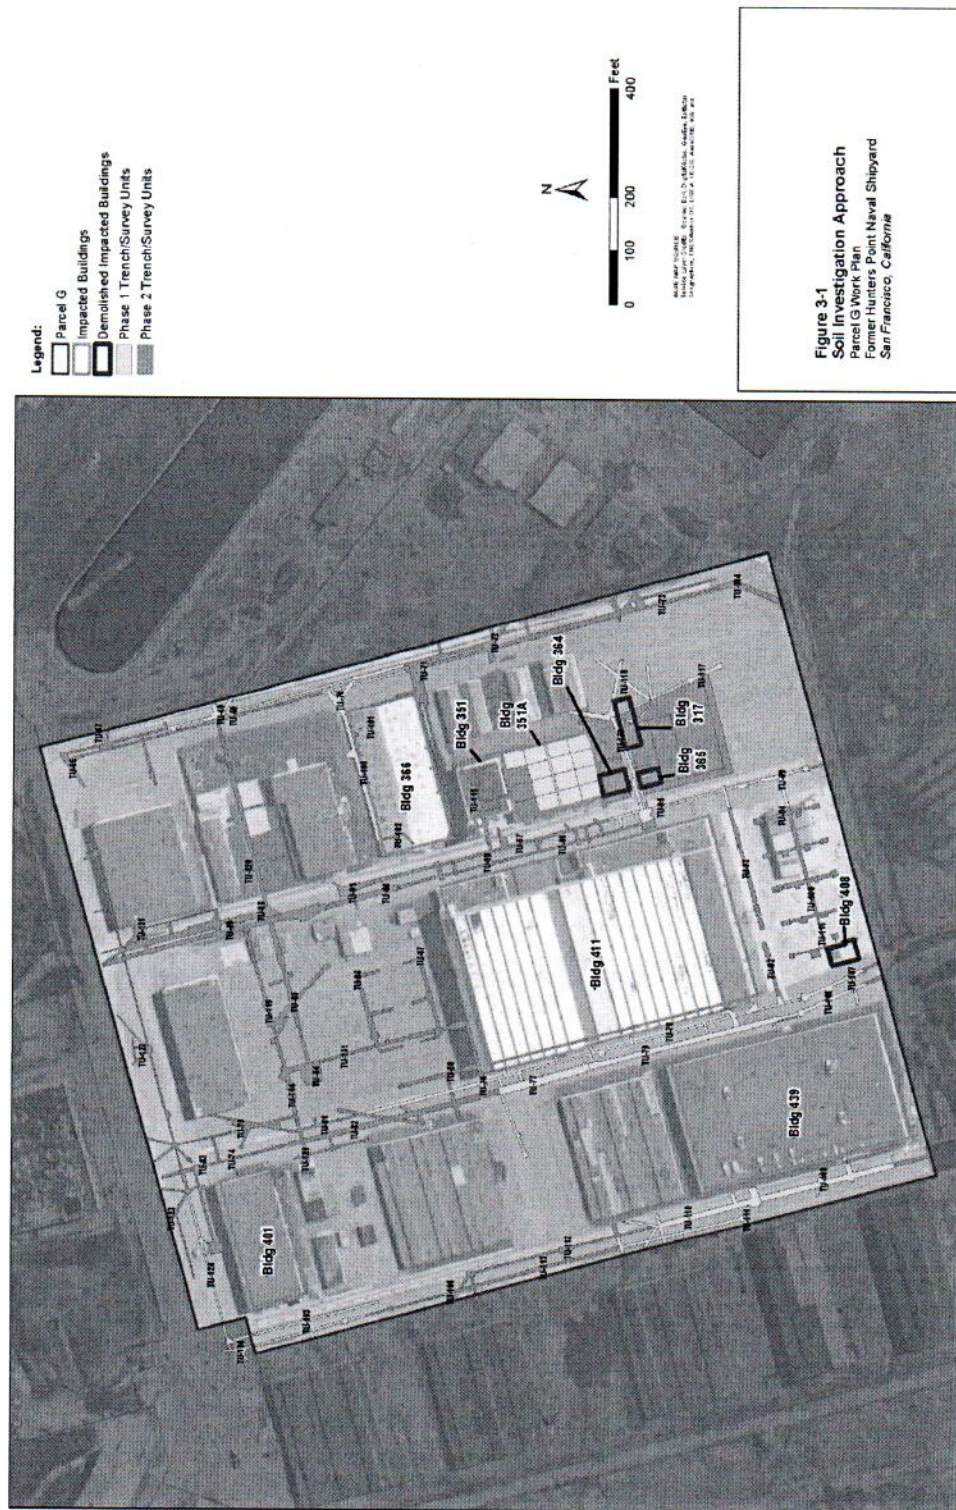

Navy Commitment

- **Nearly \$1B invested in HPNS cleanup program and will continue to dedicate resources until all successfully completed**
- **Navy pursuing Contractual Actions**
- **Navy supporting Multiple Legal Actions**
- **Incredibly complex issue, while time is of the essence, primary focus is ensuring safe clean up and transfer**
